Once you have gathered information about your topic, it will be time to begin organizing your ideas. This will make writing your report much easier.

One of the simplest ways to organize your ideas is by using a web. A web is a way to write your ideas down and organize how they go together. All of your ideas will be interconnected just like a spider web. That is why we call it a web.

Begin by writing your main topic in a big circle in the middle of your page.

The next step is to connect your ideas about cats to the big circle.

Computers once filled entire rooms. Now they fit in our pockets. How a generation formed our tech landscape.

This summer I was told that the world somehow turned to the digital age. (born 1951) told these called typewriters, but the world would mark up the machine. a need to recast a copy of paper, cut the new original not-so-hot line 'paste' came from!"

The moment neatly captured inescapably digital world. parents or grandparent's absence of television perhaps the biggest transformation like the automobile, the environment," says M. say the amount of change.

No, we don't have flying cars, colored capsules coming out of a chess machine that vibrate, instant messaging, chewing gum by means of infrared waves. The big news is digital: an amazing amount of stuff that used to happen in the physical world can now be done virtually. Like cut-and-paste, many of the realities boomers grew up with are today's metaphors.

In fact, it can be argued that the best-known baby boomer of all is the computer itself. Like many boomers, the general-purpose computer was born in the years following World War II, grew up in a restrictive environment and went batty as a young adult. Now, like the generation it grew up alongside, the computer has assumed a leadership role, while still maintaining an unruly edge.

But it would be unfair to say that the computer has transformed the lives of boomers and leave it at

**Computadoras** cuartos enteros una vez llenados. Ahora caben en nuestros bolsillos. Cómo una generación formó nuestro paisaje del tech.

Este verano hablaba con algunos empleados jóvenes de Google, y en un punto la conversación dada vuelta de alguna manera a los procesos antediluvian de la documento-creación de una más vieja generación: mina. Tan I (llevado 1951) dijo a estos twenty-somethings que hubiera una época cuando la gente escribió en las máquinas llamadas las máquinas de escribir, comenzando al principio y arando a través hasta el extremo, en que punto ella marcaría encima del manuscrito con la pluma o del lápiz para el funcionamiento siguiente a través de la máquina de escribir. Si hubiera una necesidad de modificar un par de oraciones o aún de un párrafo entero, usted mecanografiaría en una hoja nueva del papel, corta el nuevo texto de la página con la tijera y utiliza el pegamento de Elmer para pegarlo sobre las líneas no-tan-calientes originales. "Oh!" el dicho del Googlers, de la vendimia de los años 80. "Tan que es de donde "la cortar-y-goma" vino!"

El momento capturó cuidadosamente el boquete entre el mundo que los boomers crecieron para arriba adentro y el mundo ineludible digital de hoy. Ésos en la generación de la posguerra rodaron una vez sus ojos cuando sus padres o abuelos harían girar los anécdotas del coming-of-age de Lincoln-esque que abisagraron en la ausencia de la televisión, de interstates y del aire acondicionado. Pero ahora se encuentran el atravesar quizás del tecnológico más grande para dividirse en historia. "Había ciertamente transformaciones anteriores grandes como el automóvil, la radio y la TV, así que sería duro decir que la generación anterior tenía un ambiente estático," dice el cofounder Bill Gates de Microsoft. "Solamente usted puede guardar realmente una cara recta y decir la cantidad de cambio en los estos 30 años pasados ha sido mayor."

The screenshot displays the General Reference Center Gold website interface. At the top, a navigation bar includes links for 'Bookmark', 'Marked Items (3)', 'Previous Searches', 'Dictionary', 'Title List', and 'Help'. Below this, a search bar contains the text 'computers' with a 'GO' button. A sidebar on the left lists various document types with their respective counts, such as 'Brief Article(39460)' and 'Evaluation(16659)'. The main content area shows search results for 'Basic Search', including a list of articles like '1. Workshop article' and '2. Sabotage a'. On the right side of the page, a 'Bookmark' section provides three options: 'Copy the Bookmark URL and paste it into another document.', 'Send the Bookmark to your browser.', and 'Email the Bookmark URL to yourself or others.' Each option is accompanied by a corresponding URL and a 'Bookmark the URL' or 'Email the Bookmark URL' link. Red circles highlight these three options and their respective URLs.
